BigAnimal: The Smarter Way To Run Applications In The Cloud

There are many database-as-a-service (DBaaS) options to choose from, but they are not all the same. If you want to run business-critical applications in the cloud, you want EDB BigAnimal, a fully managed Postgres cloud DBaaS from the Postgres experts at EDB. BigAnimal makes it easy to set up, manage, and scale your databases. And, its native compatibility with Oracle makes it easy to shift from Oracle to Postgres without rewriting every application.

BigAnimal Gives You Consistency, Freedom, And Control You Can't Get From A Cloud Vendor

Unlike generalist cloud service providers who offer many different application and infrastructure services, EDB is focused on delivering a superior Postgres-in-the-cloud service. With the Postgres experts at EDB managing the service, your IT team will be free to focus on supporting business innovation. With BigAnimal, you can avoid cloud lock-in, stop worrying about database maintenance, and gain control over resource spend and compute consumption.

Enterprise-grade Features

Extensive Security and Compliance
Protect, isolate, encrypt, and control your data

High Availability
99.99% uptime and extreme high availability via streaming replication

Management and Monitoring
Integration with AWS, Azure, and your own processes

Backup & Recovery
Automated and easy

Your choice of Postgres

Open Source PostgreSQL

EDB Postgres Advanced Server

Runs in your cloud account

Microsoft Azure

Amazon Web Services

EDB BigAnimal: the best fully managed Postgres for enterprises moving to the cloud

→ Freedom to innovate

EDB does the day-to-day database maintenance work so your team can focus on delivering value to your business. With built-in high availability, spend less time worrying about downtime and more time developing your applications.

→ Accelerate and deploy faster

Reduce cost, time, and risk when adopting a cloud-first strategy with our managed service. Migrate your Oracle database to Postgres with our native compatibility with Oracle and comprehensive migration tools.

→ Empower IT, developers, and lines of business

Give your teams the agility to deploy Postgres clusters on demand. More rapidly spin up Postgres databases to support new applications so you can respond to your business challenges.

BigAnimal includes all the features and benefits you need in a fully managed cloud service

→ Enterprise-grade cloud database features:

- Management and monitoring via the BigAnimal console, Azure or AWS tools, with extensive APIs and a command line interface
- Role-Based Access Control and robust data security including data isolation and data encryption at rest and in transit
- Compliance with SOC1 Type 1, SOC 2 Type 2, and GDPR to support your compliance requirements (with more on the way)
- Automatic backup and recovery with the ability to restore to a point in time
- Automatically configured 99.99% high availability, with optional extreme high availability to support your mission-critical application needs

→ A fully managed service that takes care of all these tasks so you don't have to:

- 24x7 monitoring and operations
- Availability and performance
- Backups
- Security and compliance
- Operating system and database patching
- Network configuration and security
- World-class support for Postgres

→ Integrated with your cloud

- Runs in your cloud tenant
- Your data remains isolated from others
- Integrated with Azure and AWS tools

→ Business sensible terms

- Your cloud account - no infrastructure markup
- Hourly metering - pay for what you consume
- Simple per-core pricing model
- Same pricing when you shift between cloud and on-premises
